French - B1

PROFILE

I'm passionate about working with financial data collection, analysis, reconcile and presentation. I'm advanced MS Excel user so it's not a problem for me to calculate custom reports and to present data in user friendly format. It's really important for me to provide high-quality result so I am very attentive to details and any discrepancies. I've worked in accordance with international and local accounting standards (IFRS, RAS, ASC 606) so I can read and apply different technical documentations and standards, learn and follow new rules. Always looking forward to self-development both in hard and soft skills, I'm a quick learner. It's pleasure for me to be a team player but I also enjoy working independently.

WORK EXPERIENCE

Senior Analyst

EPAM Systems

Sep 2021 - Present

- I have successfully supported 80+ projects, overseeing financial conditions, revenue recognition, invoicing, and ensuring alignment of financial data with contracts
- Actively prepared data for 30+ financial closures in accordance with international standard ASC 606
- I have taken a place as a team member on strategic client for more than 3.5 years and I have supported individual client for almost 2 years independently
- Have written documentation for work process (incl. for newcomers and mature specialists)
- Provide contract support from draft stage to client payment on invoices
- Monitor budget burn down and process PO requests for around 30 contracts each quarter
- Demonstrate proficiency in handling long-term contracts with recognition of free services, aligning with international standard ASC 606
- Prepare accurate forecasting of revenue and perform analysis on a monthly basis
- Provide support and fulfill financial requests from account management and delivery management
- Work with worldwide known clients such as Microsoft India, LSEG (London Stock Exchange Group), Kynetec
