Lens, Prometheus, Grafana
REST, SOAP, Postman
Atlassian Jira, Confluence, Agile, Scrum, Kanban
Linux (Debian, CentOS, Alt Linux), Docker, Bash

Experience

ООО "БФТ"
TechLead
June 2021 - Present (4 years 6 months)

TechLead (October 2021 -Present)
Became the TechLead of the new infrastructural project. Refactored decades
of legacy services. Refactored monolith into microservices. Developed CI/CD
and tests. Development of documentation. Built processes.
• As a result, created new company infrastructure based on Kubernetes.
41 project was moved to Kubernates, Created instructions & regulations for
developer, DevOps, TeamLeads and Managers. Created training videos and
code samples, trained 18 teamleads and developers. By using Java, Spring,
Spring Boot, Docker, Helm, Bitbucket, GitLab, Kubernetes. Python, Golang,
Rancher, Lens, Prometheus, Grafana.

• Developed a new company GitFlow. Built work processes and development regulation for programmers, TeamLeads, QA, release managers.

Senior Java Developer(June - October 2021)
Development of a system for job search by using Java, Spring, Spring Boot, Spring Security, ElasticSearch, Redis, Kafka
• Developed content storage system for corporate CMS in 4 month.
• Improved decades of bugs

OTP
Senior Java Developer
October 2020 - June 2021 (9 months)
Москва, Россия

• Development of API for the regional portal of public services. Development of systems of interdepartmental interaction. As a result, 17 new government services had been developed. This allowed the company to meet the deadline and complete the project. By using: microservices architecture, Java, Spring Boot, Apache Camel, ActiveMQ, Swagger, REST, Jackson, JAXB, MongoDB.
• Development of an automated workplace of the employee. As a result, improved existing solution and added new functional by using Java, Spring, Spring Boot
• Development master data management service. As a result, two decades of new monitoring parameters. MDM uses complex formulas to obtain estimates of the performance of multifunctional centers. By using Java, Spring, Spring Boot, MongoDB.

Green Tree Development
Founder
March 2019 - October 2020 (1 year 8 months)
Ногинск, Московская область, Россия

Outsourcing company for the development of systems from scratch / or refinement
- Development of information systems
- Estimation of terms and cost of development
- Analytics of existing solutions. Building new architectural solutions.
- Selection of the necessary specialists
- Decomposition of tasks and control of deadlines
- Negotiation and approval of documentation

BurnsOffroad

Java Developer
October 2018 - January 2020 (1 year 4 months)
Москва, Россия

International startup aimed at the market of the USA, England and Russia.
The project unites off-road funs and provides them with a social network and
convenient maps.There are web maps, Android maps, IOS and offline maps

• Developed and designed map subsystem. The subsystem provides data
access.
• Developed and designed data storage system. Data volume more then 2Tb.
The availability and speed of data acquisition is ensured.
• Developed data processing algorithms.
• Developed API for data access from web, Android, IOS clients.
• Datasets for mobile devices has been created
As a result, A platform based on microservice architecture was designed and
developed. Created mobile applications with offline functionality.By using
Java, Postgres, SQLite, REST API, Bash, Docker

Education

Moscow State University of Geodesy and Cartography (MIIGAiK)
Engineer, Information Systems and Technologies · (2005 - 2010)
