SUMMARY

Frontend Engineer with 3+ years of hands-on experience building responsive, accessible, and scalable web apps with React and TypeScript. Comfortable across the stack of modern tooling (React Query/RTK, Vite/Webpack, Jest/RTL, CSS-in-JS/SCSS, REST APIs). Strong focus on clean code, DX, performance, and reliable integration with external services. Habitually refactor legacy code, write tests, and align UI with design systems. Constant learner, eager to ship features that balance usability and maintainability.

SKILLS

- **Languages & frameworks**: JavaScript, React, TypeScript, Redux, RTK, RTK Query, HTML, CSS, Bootstrap, jQuery, Node.js, Cypress, Express, Next.js.
- **Development Tools & Libraries**: Git, Mantine, SCSS, Sass, NPM, Gulp, Webpack, Axios, Vite, Jest, TailwindCSS, MaterialUI, Figma, FSD, React Testing Library, React Query.
- **Software Methodologies**: Agile / Scrum, TDD, Waterfall, Canban.
- **Practices**: REST API integration, component design, state management, caching & pagination, accessibility, responsive design, performance profiling, CI-friendly testing, code review, refactoring.

LANGUAGES

- English - Professional working
- Russian - Native or Bilingual
- Belarusian - Native or Bilingual

WORK EXPERIENCE   Apr 2025 - present

CLIENT: UPTRADE - FRONTEND ENGINEER

Domain: B2B marketplace / eCommerce .

Project: Seller & marketplace.
Project Role: Frontend Developer

TASK PERFORMED:
- Implemented numeric range filtering for catalog properties with debounced inputs, controlled form state, and clean API payloads.
- Refactored code according to new requirements.
- Improved error handling for actualization flows; added actionable user feedback.
- Standardized API layer (Axios), consolidated request params, and aligned types.
- Actualization endpoints, removed legacy calls, normalized responses, and surfaced backend alerts with clear UI actions.
- Refactored modules to new requirements.

Technologies Stack: React 18, TypeScript, React Query, Mantine UI, SCSS, Axios, Vite/Webpack, Jest/RTL, Docker, Git, Django, JQuery, PHP, Vue.js.

CLIENT: NDA - FRONTEND ENGINEER - EXPOSIT SP. Z O.O.　　Sep 2023 - Jan 2025

Domain: eCommerce.

Project: "NDA". The project was aimed at selling comics from all over the world. And the company also produced its own merch. Aiming to streamline business processes, enhance claims processing efficiency, and improve customer interactions. The technology stack revolves around React, including Redux emphasizing security, and high performance.

Project Role: Frontend Developer

TASK PERFORMED:
- Built and maintained features in React + Redux with RTK; integrated with external APIs/services.
- Collaboration with external APIs and services.
- Code testing, bug fixing, and performance optimization.
- Analysis of business requirements for effective feature implementation.
- Refactored legacy code to meet new requirements and improve security.
- Participated in coding, reviews, and authored application tests.

Technologies Stack: JS, React/Redux, Jest, Next.js, Node.js, HTML, Sass, MongoDB, Rest API, NoSQL, React Testing Library, WebdriverIO, Vue.js.

CLIENT: NDA - FRONTEND ENGINEER - EXPOSIT SP. Z O.O.　　Jan 2023 - Aug 2023

Domain: Energy and power supply.

Project: "NDA". The project was aimed at selling electricity. The company acted as an intermediary between the electricity supplier and the buyer. The development was carried out on the interface to provide all the necessary information.

Project Role: Frontend Developer

TASK PERFORMED:
- Developed new features for the current platform, focusing on enhancing functionality.
- Refactored codebase to new requirements; fixed defects and improved performance.
- Analyzed and fixed errors, and performed performance testing.
- Built an internal tool to auto-generate required onboarding projects/services for a SaaS delivery management platform — helped cut onboarding time/costs and increased successfully onboarded carriers.

Technologies Stack: ReactJS, HTML, Jest, Less, Next.js, Node.js, TypeScript, AutoFixture, MySql, AWS (using EC3 instances, load balancers, etc.), React Testing Library.

CLIENT: NDA - FRONTEND ENGINEER - SONORALAB　　Nov 2022 - Jan 2023

Domain: Event discovery & booking platform.

Project: An online platform for discovering and booking unique music events.

Project Role: Frontend Developer

TASK PERFORMED:
- Developed component architecture with React + TypeScript; adopted Tailwind CSS and Radix UI for accessible components.
- Optimized event filtering using React.memo, useCallback, and memoization → +32% render performance (measured locally).
- Refactored legacy parts, reduced duplication; increased test coverage from 52% → 85%.
- Implemented dark mode and user preference management.

Technologies Stack: JS, React, Bootstrap, Jest, MantineUI, TypeScript, RadixUI, php.
