About Me

Results-driven System Analyst with 6+ years of experience in IT and over 12 years of general experience in the banking system.

information systems. Focused on documenting requirements, complex integrations, working with a database, analyzing incidents and eliminating their causes. Responsibility and discipline is a collaboration of my personal skills that are guaranteed to yield results. Know how to find an approach to tasks of different levels and communicate solutions to the management and the team.

TECHNICAL SKILLS

- Application Architecture Design
- REST API & Web Services
- SQL (PostgreSQL, Oracle, DB2)
- Database Optimization
- Systems Integration (ESB, Kafka, RabbitMQ)
- UML & BPMN
- Requirements Documentation (Jira, Confluence)
- Agile & Waterfall Methodologies
- Testing & QA: Postman, SoapUI
- Solution Prototyping: Figma, MS Visio, Draw.io, Miro

Education

Economist, Finances and Credit
Belarusian State   2013-2017
Economic University

Languages

English - Intermediate

Experience

System Analyst, Andersen

2021-Present

- Analysis of the current architecture and processes (As-Is), identification of system weaknesses
- Formation of proposals for the modernisationof architecture and processes (To-Be)
- Project management as a project coordinator (task assessment, deadline control, project presentation to the team)
- Identification and description of requirements (for database objects, services, inter-system interaction)
- Conducting log analysis
- Preparing proposals for optimisationof the database performance (optimisation of SQL queries / procedures, reduction of queries to the database, reduction of the database volume)

Technologies and tools:
UML, C4, Figma, PlantUML, Jira, Confluence, Postman, REST, PostgreSQL, Oracle, Kafka, RabbitMQ

System/Business Analyst, Alseda Consulting

2020-2021

- Documented the requirements for the software being developed, described the business and functional requirements, designed the API
- Interaction with Customers in terms of informing about the progress of work, agreeing on the release dates and scope of work, agreeing on the developed requirements
- Assisted the Customer in generating new solutions for product development, including the creation of new functionality and directions
- Coordination of the activities of the teams on the implementation of the release plan in terms of development, testing, implementation of functionality

Technologies and tools:
UML, BPMN, Figma, Draw.io, Miro, Gliffy, Jira, Confluence, SoapUI, Postman, REST, SOAP, PostgreSQL

Experience

System Analyst, Alfa Bank

2019-2020

- Architectural design and description of the interaction logic of the system layers (front, middle and back)
- Collection, analysis, formalization, documentation and approval of requirements
- Development and approval of project documents (BRD, FSD, regulations and instructions) with the Customer
- Analysis of emerging incidents related to the functioning of the system, development and implementation of solutions to eliminate them
- Monitored the implementation of requirements by development teams
- Managed the timing of the implementation of functionality
- Participation in testing (back, front)
- Wrote SQL queries required to generate reports for related departments
- Communication with stream leaders, development team

Technologies and tools:
BPMN, MS Visio, SQL, DB2, REST, Jira, Confluence, SoapUI, Postman
